TYGART SERVICES

Tygart is a small business that provides quality information technology solutions to the federal government. During our 20 year history, Tygart has promoted a high-tech corporate culture and understands the value of continuous professional development and training that advance the evolution of innovative solutions for our customers.

We strive to earn our customers' trust and exceed their expectations every day. Tygart provides outstanding service performance to support our customers' missions with a wide range of IT services and solutions including:

IT Security Management Services	Software Engineering Solutions
Systems Engineering and Infrastructure Support	Biometric Intelligence Integrated Solutions
Program Management Services	Consulting Services

IT Security Management Services

Tygart works collaboratively with our customers to protect their infrastructures and information while providing a roadmap to adhere to federally-mandated security standards. Our services span the IT Security spectrum, from providing our clients Certification and Accreditation audits, to implementing IT solutions to support security policies, processes and procedures.

- Security Assessment and Authorization
- Risk Assessments
- Configuration Management
- Audit and Accountability
- Identification and Authentication

Systems Engineering and Infrastructure Support

Tygart prides itself on enabling technology through infrastructure modernization, designing and implementing cost efficient mission-focused solutions for our customers while maximizing their investment. Our goal is to accelerate IT infrastructure modernization necessary to maximize operational performance without impacting end users.

- Server standardization, upgrades, consolidation, virtualization, End of Service Life monitoring and enhancements
- Desktop standardization and upgrades
- Messaging infrastructure upgrades

TYGART
TECHNOLOGY

Program Management Services

Tygart is an independent and trusted provider of program and project oversight and analysis. Our leadership role assures that project objectives are aligned with organizational goals for efficient project execution.

- Providing independent analysis of strategic technical alternatives
- Developing processes and policies for adherence to agency standards and guidance
- Analyzing financial indicators to optimize project performance
- Fostering open communications through independent reporting

Software Engineering Solutions

As a provider of leading edge technology for innovation in the Intelligence Community, Tygart delivers innovative software solutions including new product development, modernization, operations and maintenance. Our software engineering expertise includes implementation of scalable cloud-based solutions, COTS integration efforts and application re-hosting.

- Business Intelligence solutions
- Electronic discovery applications
- Web-based, public facing applications
- Data Warehousing applications and databases

Biometric Intelligence Integrated Solutions

Tygart provides trusted and proven biometric engineering solutions for programs of national importance and law enforcement. Our customer success is best represented by our Media Exploitation Server (MXSERVER™); a scalable, server-based face recognition solution.

Consulting Services

Tygart delivers personnel targeted to specific client needs across a variety of areas of expertise and requirements. We put our client's missions first, and deliver the right people to ensure project and mission success. Every project, regardless of size, benefits from great care, attention to detail, innovation and a commitment to quality and efficiency.
